NVU ELECTRONICS TO BE CANADIAN DISTRIBUTOR FOR AUDIO VIDEO METALS EQUIPMENT RACKS

Toronto, Ontario (May 9, 2009) – NVU Electronics Inc. is pleased to announce it has partnered with Ontario-based Audio Video Metals to become their Canadian distributor.

Audio Video Metals is a designer and manufacturer of high quality metal racks and rack equipment for the audio and video production and distribution industry. Their automated CNC machinery allows for close manufacturing tolerances, ensuring that accessories and components fit and are interchangeable. “Our products allow installers to provide custom rack solutions for their customers at highly competitive price points, making AVM racks the ideal choice for the Custom-Install channel” said Wayne Daigle, President of AVM.

“We are excited to be working with AVM, and look forward to a prosperous new relationship together,” said Bobby Revai, President of NVU Electronics Inc. “Given the current economic situation, it was a logical step to partner with a local company that manufactures their products right here in Ontario, which will give our resellers faster delivery times, and stable pricing – all while supporting the Canadian economy.” adds Revai. AVM also has the ability to make customized racks to suit specific client needs with a lightning fast turnaround time.

NVU will be the primary source for service and support on the AVM product line, and will work closely with the reseller channel to get them the right products for all their installation needs.

AVM is based out of Aurora, Ontario, and can be accessed online at www.audiovideometals.com.

NVU Electronics Inc., is a Canadian distributor of Consumer Electronics & Home-Theatre products. NVU also has a Custom Installation division offering design & service solutions for resellers. You can contact NVU through their website at www.nvu.ca, or by phone at (866)411-2NVU.
